recycled re-UP[®]

| A textile-to-recycled fabric bag solution by Allround Recycling

| *Closing the loop in the textiles industry*

INTRODUCING THE

RECYCLED re-UP BAG

To contribute to closing the loop, we have created a discarded textile-to-recycled fabric bag.

Our recycled re-UP bags are made from 100% discarded, unwanted textiles and are designed to be reused again and again and again.

Our core range of discarded textile-to-recycled fabric bags are available in three styles with the option to be customised or co-branded to maximise your brand exposure and commitment to genuine sustainability and social initiatives.

We give unwanted, discarded textiles another life and make them fit for a new purpose.

ABOUT THE BAG

Our core range of discarded textile-to-recycled fabric re-UP bags are available in three styles – The Essentials Bag, The Daily Bag and The Shoppers Bag – with stylish designs that deliver educational messages to your consumers about the sustainable and social benefits the bags deliver.

The Essentials Bag

The Daily Bag

The Shoppers Bag

The re-UP team can work closely with you to produce customised or co-branded solutions that are tailored to align with your brands' vision and customers, with the only limit being your imagination.

re-UP discarded textile-to-recycled fabric bags can be customised to your desired specifications, allowing you to ensure the end product is perfect for your application and representing your brand, whilst contributing to closing the loop in the textiles industry and positioning your brand as taking genuine action to protect the environment whilst contributing to social causes.

Opting for a co-branded option and working in collaboration with re-UP, you instantly add credibility to your sustainability initiatives and differentiate your bag from any other tote on the market.

re-UP bags are available for purchase in 100% recyclable boxes in order to maximise handling costs and distribution efficiency. By maximising carton quantity, we reduce packaging waste and energy resources used to deliver re-UP to consumers.

WE LOOK FORWARD TO MAKING THE WORLD GO ROUND WITH YOU

THANK YOU FOR CONSIDERING US

Thank you for taking the time to read about our discarded textile-to-recycled fabric bag range. We look forward to partnering with you on this project and contribute to closing the loop in the textiles industry.

Please feel free to contact us at any time to find out more about re-UP and/or alternative sustainable packaging solutions we can provide for your business through our associated company.
