

**FASHION REIMAGINED**

re-UP

# PATHWAY TO CIRCULARITY

Witness the rebirth of pre-loved fashion as we give it a new life, front and centre, in our reworked collection. The collection is a rebellious twist on sustainable style, with one-of-a-kind pieces that are truly unique.

Our mission is clear: to reduce textile waste and give fashion a longer lease on life. By supporting a circular economy, we're helping to curb the 92 million tonnes of clothing discarded globally each year.

Capitalising on the abundance of textiles and clothing discarded each year, we're seizing this opportunity by the threads, reimagining pre-loved clothing into a fashion forward lineup of apparel and bags.

Our proven approach to innovation and reimagining fashion is paving the way for a more circular and responsible future.

Become a stockist and be part of the change, meet evolving consumer trends while making a meaningful difference together.
